

IFIB ACT-JWC-21-15
GRAPHICS PRODUCTION SUPPORT SERVICE
WEEK 20 FINAL
Q&A

[1Q:](#) Can the printer be installed along this wall? (red marking)

ANNEX F – FLOOR PLAN

Room 2058 34.1 m² - is the Printer Room.

1A:

As shown in Annex E – Pictures of Print room, picture on page 2 and 4, there is a custom made ventilation system on parts of that wall made for the Plotter, binder, laminator and engraver. Therefore unfortunately, it is only possible to install the system where it is not in conflict with the ventilation system.

[2Q](#) this is a previous Q&A:

3Q: Annex B-2 Number of trays. Will 4 trays be sufficient? Is a separate bypass feeding a requirement?

3A:

Minimum 5 Trays including bypass tray will be required

[Will then 5 trays including 1 tray used as bypass be accepted?](#)

2A: We refer you to the: “MEMORANDUM FOR RECORD AND HOLD NOTICE IFIB ACT-JWC-21-15” dated 03 May 2021, stating that Q&A 17 and 17-2 where this question derives from, is void and is to be disregarded. Thus we are specifying that; only the original requirement specification is valid.

We encourage you to submit a bid based on what your understanding is of the minimum requirement, as stated in Annex B-2.
