

IFIB ACT-JWC-20-60

Q&A Week 37

Q: Items 10-20 – is it only table top or is it table top + table frame?

A: Complete desk; desk top, legs with lift, cable support, pre-drilled hole for cables / as shown in photo

Q: Items 21a -22b – Are these items table frames for items No. 10-20?

A: Partly yes. It's only the electrical lift for desk top. JWC ask these to be separately priced, as in some cases we might have a desk top already

Q: Items 23a-23f – are tables height adjustable (mechanically or electrically)? Or are the tables with fixed height +/- 75 cm?

A: Tables, mechanical adjustable feet, but JWC have not a predefined requirement for how many centimeters required. JWC mean that there is a standard in the marked, e.g. +/- 75 cm, and that there is a possibility to adjust a few centimeter, with e.g. plastic device in the bottom to adjust height.

Q: Items 26-30 – are these cabinets' metal or wood (melamine faced chipboard)?

A: Wood. Note that JWC have requested specific colors for frame / shelves

Q: Items 31A – 31 B – are drawer units metal or wood (melamine faced chipboard)?

A: Wooden drawers (Particle board inside / veneer plywood or similar outside).

Q: Items 35 – 38 – are bookcases really veneered? Or can we use melamine faced chipboard?

A: Veneered layer on top of chipboard is requested by JWC. Veneered layer is considered a stronger surface by JWC.
